Våldtäkt	7 132	+395	+6 %	+2 482	+53 %

För våldtäkt har antalet målsägare ökat med 53 procent för kvinnor och flickor, samt 64 procent för män och pojkar sedan 2015. Vid våldtäkt bör man dock hålla i minnet att lagstiftningen har ändrats under tidsperioden, vilket innebär att våldtäktsbegreppet juridiskt har utvidgats till att omfatta fler handlingar. Vissa personer registrerades flera gånger som målsägare för samma
brottstyp under ett år. Det var vanligare bland målsägare för misshandel, våldtäkt, ofredande och olaga hot. I USA räknas det som en våldtäkt även om En person utfört 100 våldtäkter mot en person. Därför kan statistiken inte jämföras med den i USA.

US Homicides year 2021

This is a list of US states by gun deaths and rates of violence. In 2021, there were 26,000 gun suicides and ***21,000 gun homicides***, together making up a sixth of deaths from external causes. Gun deaths make up about half of all suicides, and over 80% of homicides.

In 2021, gun deaths rose to levels not seen since the 1990s, but remained below rates of the 1970s

A 2022 study found that guns were the cause of more years lost than any other source of traumatic injury, including motor vehicles.
